CLOUD designed by Jonas Wagell 2013

Cloud is a further development of the ordinary white opaque globe; a soft, billowing cloud shape that is created by blowing glass into a mould and giving it an acid-etched finish. Cloud has a red or yellow light-filter that colours the top of the glass when lit. It looks good seen from different heights. The lamp is suspended with a wire attached to the lamp fixture inside.

Article number	height mm	diameter mm	Bulb	Flex
CLO39Pw opaque without filter	300	390	E27 led dimmable	transparent
CLO39Py opaque with yellow filter	300	390	E27 led dimmable	transparent
CLO39Pr opaque with red filter	300	390	E27 led dimmable	transparent
